

## Tumurly® AVK22

Anti Vibration Kit for Turbo Series Wind Turbines

### Durable vibration damper

Tumurly® AVK2 reduces the natural vibration of the wind turbine rotating on the mast and therefore the transmission of structural noise in the home would be low. Mounting is very easy as the mounting holes have the same dimensions as the wind turbine. It should be installed between the turbine and the mast and screwed with the matching screws on the mast and the wind generator.

### technical data

Weight	1,5kg	Dimensions	
Max. Turbine Weight	60kg	Height	15cm
Applicability	Turbo Series	Width	15cm
		Length	15cm
